### CHAMPAGNE ROGER-CONSTANT LEMAIRE FAMILY-ESTATE GROWER-PRODUCER HANDCRAFTED CHAMPAGNES

[www.champagne-lemaire.fr/en](http://www.champagne-lemaire.fr/en)

<b>Rosé de Saignée Brut</b>	Rosé	NV	50% Pinot Noir 50% Pinot Meunier	Champagne	6 x 750 ml
-----------------------------	------	----	-------------------------------------	-----------	------------

Rosé de Saignée Limité NV This is a rare and authentic Rosé champagne, a blend of 50% Pinot Noir and 50% Meunier. It is produced by the traditional saignée “grape skin bleed” maceration method, thus giving its authentic Rosé color and taste. This has become a very rare approach due to the expense and expertise involved. It is not the copper or amber color of most Rosé as it is not produced from the cost-effective method of blending in red wine, as most current rosés do. Making this Rosé even more special and rare, its natural acidity exists due to non-malolactic fermentation methods, as well as no fining, no filtration, and low sulfites. Handcrafted by 5th generation artisanal grower-producer Champagne RCL.

<b>Cuvée Trianon 1966 BRUT</b>	White	NV	40% Chardonnay 50% Pinot Noir 10% Pinot Meunier	Champagne	6 x 750 ml
------------------------------------	-------	----	---	-----------	------------

Cuvée Trianon 1966 NV – Limited Edition Trianon is inherited from winemaker Roger-Constant Lemaire, who registered the brand name into the family emblem in 1966. It is made from the same grapes as the classic award-winning Cuvée Trianon, but with the addition of adding 10% of Meunier grapes from 35 year old vines on the prestigious Marne Valley terroir, giving it a distinguished fruity element specifically for the American market. Natural acidity exists due to nonmalolactic fermentation methods. No fining, no filtration, and low sulfites. Handcrafted by 5th generation grower-producer Champagne RCL.

#### ALSO NOTE:

**90-95% ORGANIC (NO PESTICIDES, NO ACARACIDES, NO CHEMICAL FERTILIZER)**

**USE OF NORWEGIAN ALGAE FOR SOIL ENHANCEMENT**
